

BELLA MANUFACTURING

QUALITY

CUSTOM COMMERCIAL MOBILE FOOD UNITS

Bella Manufacturing is one of the leading custom mobile food manufacturers in Australia. With 30 years' experience in manufacturing and hospitality, we deliver a premium end-to-end solution from initial consultation, CAD and engineer designs, through to development, build and after sales support.

Every vehicle is compliant with Australian standards and regulations and our customers are guaranteed a heavy-duty, quality professional finish with nation-wide warranty.

TRUCKS | TRAILERS | CONTAINERS | COFFEE VANS | CARTS

Food Trucks

Your Bella food truck is a commercial kitchen on wheels, built onto any suitable cab chassis truck. Renowned for its superior quality and with special focus on a premium professional finish, we fabricate all our vehicles with high-quality Australian steel and materials. The customisable nature of our units is the core element of our business. This, in conjunction with the guidance from our team of industry experts, ensures your design will be optimised to suit your specific business objectives.

Food & Promotional Trailers

Our high-end bespoke service allows our customers to have a customisable mobile food solution to suit specific business requirements. Each trailer is made to order, allowing customers to choose a trailer that is as big or as small as needed, as well as pick from a large range of equipment and specifications. Adding a vehicle wrap acts as a mobile billboard, allowing brands to stand out in the crowd.

Container Kitchen, Bars & More

From commercial kitchen fit outs and modular mobile bar solutions, emergency services command posts and commercial showrooms, to mobile offices and workshops, modified shipping containers are increasingly popular and great for catering to large groups at corporate functions, events or for use as semi-permanent catering options to staff within the mining industry.

Fully insulated, fitted out with commercial, reliable appliances and with a variety of flooring options and custom extras, our shipping container commercial kitchen fit outs enable hygienic food and beverage preparation and comply with the Australian Standard for the Design, Construction and Fit-out of Food Premises (AS4674-2004).

Smoko Trucks

A Smoko Truck is a great alternative to the traditional coffee van and the perfect solution for smoko runs, tuck shop on wheels and on-site catering. Built on a custom steel tray, we add a 50mm food-grade insulated panel, lift up doors, rear bumper, and skirts under the canopy. Once the custom designed interior is complete, eye-catching vehicle wraps can be added to promote your business. Full fit-out with vehicle provided, or we can mount a canopy to a new or pre-loved vehicle.

Coffee & Ice Cream

Designed to cater to the door-to-door market, a Coffee and Catering Van can be fitted out to enable service of hot and cold food, drinks, and ice cream. We offer a full fit out with van included or can fit out an existing vehicle designing and building a custom layout to suit. Sleek, contemporary, and superior quality, our customisable vans are comfortable to operate in and set up with quality cooking, coffee or ice-cream making equipment.
